

Change Notification

Date: 14-AUG-2026

Change Notification Number: CN0093

Description of change:	Kementec Solutions is currently conducting a review and alignment of our Safety Data Sheets (SDSs) and associated product labeling across our product portfolio. As part of this routine documentation update (e.g. standardizing terminology such as transitioning legacy references from MSDS to SDS), SDSs and corresponding product labels are being updated to ensure consistent formatting and compliance. Note: There are no changes to product formulations, manufacturing processes, specifications, or product functionality.
The following will be changed:	Safety Data Sheets (SDSs): Harmonization of layout, section phrasing, and updated terminology (e.g. MSDS to SDS). Additionally, labelling requirements are updated where needed. Product Labels: Updated where applicable to ensure alignment with the updated SDSs with regards to labelling requirements.
Implementation date/lot number:	Effective Date & Timeline: Implementation is effective immediately, and the rollout is expected to be fully completed by the end of 2026. Lot Number / Batch Impact: No impact on lot numbering, batch release criteria, or product shelf life. Implementation is continuous across production lots as updated document versions are released.
Additional information:	Updated SDS documents will be accessible directly on our website (https://kementec.com/knowledge-center/technical-documents/sds/), as well as through our standard distribution channels and upon request. For any questions regarding this notification, please contact us at support@kementec.com.
