kementec PROVIDING IMMUNOASSAY SOLUTIONS

Change Notification

Date: 06-AUG-2026

Change Control Number: CC0094

Change Notification Number: CN0092B

Description of change:	This notification is to inform you of a like-to-like change in the primary packaging material used for our products supplied in 220 L drums. In order to optimize and streamline our packaging, the 220 L drums used to supply bulk pack sizes will be changed to another drum in a like-to-like exchange. The new drum has undergone full internal evaluation and quality testing is ongoing to verify product compatibility.
The following will be changed:	**Scope of Change:** Primary packaging for all products supplied in 220 L drums (catalog number suffix **"S"**) will be changed. Visual comparison of the current and new drum can be found in **Appendix 1**. **Product Identification & Catalog Numbers:** The product catalog number suffix ("S") will remain unchanged. *Note: There are no changes to the product formulations, specifications, manufacturing processes, or quality control parameters.*
Implementation date/lot number:	The implementation date for this change is: 09-NOV-2026 *Note: Customers can expect to receive the new packaging material from this date forward. After the implementation date there will be a period of time when existing stock of the current packaging material will be used up. Customers may therefore receive both types of packaging material during this period.*
Additional information:	**Product Integrity & Quality:** The change in primary packaging material does not impact the quality, functionality, or shelf-life of the contained products. **Feedback / Questions:** Should you have any questions, or need clarification regarding this notification, please contact support@kementec.com or visit our website www.kementec.com.
